

## Stanley Neoh Jia Jun (A0234457B)

### My thoughts on my accomplishments in the assignment

The making of this web application has been quite challenging but fruitful. I encountered many hiccups during the development process from PostgreSQL not being installed properly to facing compilation errors on Heroku during deployment. This was my first time properly developing something and at first glance the assignment appeared too much for me to handle. I have thought of giving up at several points in time during development but eventually, I have learnt to take things one step at a time. I began with a plan before building the backend one model at a time before moving onto the frontend with React. I learnt how much I can do without having to fully understand the inner workings of the framework. I am quite proud of this tiny app and have developed much appreciation for the amount of engineering that goes behind the software all around me. I intend to get my hands dirty with another project soon. Overall, I thoroughly enjoyed the development process and being able to see a working product appear before me.

This is the Tasks page. You can see all your tasks and all public tasks from other users. You can inspect a certain task, user, or tag by clicking on them as shown above as well as sorting the tasks by clicking on the respective header. You can add a new task by clicking on the respective button or search for a certain task with the search bar.

## Make Searching Case Insensitive

Description	Search appears to be sensitive to the case. Perhaps set all to lowercase before searching
Importance	Low Importance
Time Left	6d 23h 35m 24s
Deadline	2022-01-31
Public / Private	Private
Completed	Completed
Owner	<a href="#">stanley</a>
Tags	<a href="#">CVWO taskapp</a>

Edit Task
Delete Task

Inspect User

Inspect Tag

When inspecting a task, you can only edit the task or delete the task if you are the owner. The time left is colour coded according to urgency.

Finally, we come to the inspect user page. Here you can look at all the Tasks and Tags associated with the user. All functionalities like searching or sorting of tasks or tags are supported for these tables as well. You can click on “Your Tasks” and “Your Tags” to collapse or expand the table for better usability. You can also log out, change password, change username, or delete your account. Deleting your account will delete all associated tasks and tags from the application as well.
